

What to do today

IMPORTANT Parent or Carer – Read this page with your child and check that you are happy with what they have to do and any weblinks or use of internet.

1. Find out about Star Wars droids

- Look at [Droid Pictures](#).
- Read [Droid Descriptions](#). Look for any clues that will help you to match each description to the right picture. Look up any vocabulary you may be unsure of in a dictionary or ask an adult at home.
- Read [Droid Questions](#). How many can you answer?
- Check your answers with [Droid Answers](#).

2. Invent a droid

- Design a droid that would be most helpful to you.
- Draw your droid. Write a description of it. You can make up your information! You could write an advert for your droid too.

3. Imagine living gadgets

- Imagine if some modern day gadgets had personalities like the Star Wars droids, e.g. your watch could speak to you and gave you advice on how not to be late!
- Complete [Gadget Personalities](#).

Droid Descriptions

Match the description to the picture. Look carefully at the picture for clues and read the writing looking for any links.

BB-8

BB-8 is a BB-series astromech droid. Astromech droids are a type of repair droid. It has a dome head similar to R2-D2, with the bulk of its body made up of a rolling ball. It is mostly white, with some silver and orange on its body, as well as a photoreceptor.

R2-D2

R2-D2 is a small astromech droid, standing 0.96 metres tall. He rolls on three legs, one of which can retract into his body, and has a silver and blue domed head. His white, blue, and silver body houses many arms, sensors, and other apparatuses, many of which are not readily seen by the typical human eye. While R2-D2 contains many specialised gadgets, he is also quite good at taking the initiative and often employs unorthodox means to help his friends.

L3-37

L3-37 is a custom self-made piloting droid, able to fly spaceships. She is a unique droid, assembling and improving herself with scraps of other droids, including her torso, which she pieced together from an old astromech. Her plating is grey/silver and, like C-3PO, she is bipedal.

C-3PO

Built by Anakin Skywalker, C-3PO is a protocol droid intended to assist in etiquette, customs and translation. Gold-plated and bipedal, the droid is fluent in over six million forms of communication. He has developed a fussy and worry-prone personality through his many decades of operation.
