

Year 5 Geography

Africa

Take a look at our class knowledge mat about Africa. Africa is the 2nd largest continent and has 54 countries. It stretches above and below the equator, so it includes a huge variety of landscapes including: deserts, rainforests, beaches, mountains, volcanoes, islands, savannah plains, lakes, etc.

Create a fact-file about a country within Africa.

Where is it located in Africa?

What landscapes would you find there?

What is the climate like?

What plants grow there?

Which animals live there?

Have a look at the 'Introduction to Kenya' from KS2 BBC Bitesize for ideas:

<https://www.bbc.co.uk/bitesize/clips/zrsgkqt>

You can present your work any way you wish. This could be using PowerPoint, a poster, a booklet or another way that you decide.

We would love to see your finished work. If you'd like to show us how you're getting on, send an email to the class email address: stpetersy5@sthelens.org.uk
