Art and Design Concept Definitions

| Concept | What does it mean and why do we learn it? |
|-----------|---|
| Collage | Collage describes both the technique and the resulting work of art in which pieces of paper, photographs, fabric and other items are arranged and stuck down onto a supporting surface. |
| Printing | Printing is the process of making images that can be transferred onto other surfaces. It can be used to make one or more identical images or to create repeating patterns on papers and textiles. |
| Sculpture | Three-dimensional art made by one of four basic processes: carving, modelling, casting, constructing. |
| Painting | Painting is the practice of applying paint or other media to a surface, usually with a brush. In art, the term painting describes both the act of painting, (using either a brush or other implement, such as palette knife, sponge, or airbrush to apply the paint); and the result of the action – the painting as an object. |
| Sketching | Traditionally a rough drawing or painting in which an artist notes down his preliminary ideas for a work that will eventually be realized with greater precision and detail. The term also applies to brief creative pieces that per se may have artistic merit. |
| Drawing | A picture or diagram made with pencil rather than paint. |
